

GENERATIONS OF BEING FIRST IN THE FIELD

SELECTING THE RIGHT SEED

for your soil conditions is critical for a high-yield crop.

A successful growing season starts with selecting the best seeds. With ever changing pests, weeds and climate conditions, make a sound decision and partner with a company that invests in agronomic research and technology.

As farmers, we understand the soil and conditions you face for corn, soybean and sunflower seeds. That's why we develop traits to deliver high yields and exceptional profit potential.
