

Davis Lawn Care has some Spring tips

Marcus Davis Lawn Care has been serving Carlinville and the surrounding communities for over 20 years. They offer a wide variety of lawn care and landscaping services; including lawn mowing, fertilizing and weed control, brick paver patios, retaining walls, new landscape installation, lawn seeding, and much more. Spring is a great time to get your lawn and landscape ready for the year. It is important to do a full spring cleanup early in the season, this includes, picking up all the leaves in the yard and flower beds, cutting back all dead growth on plants and shrubs from last season, and spreading a new coat of hardwood mulch. Allowing leaves to sit on grass or plants will smother their growth and cause them to die. Spring is also the correct time start a lawn treatment program. We start by applying fertilizer with crabgrass preemergent control and spraying broadleaf weed control and continue with a 6-step program to keep your lawn looking nice all year long. Finally, spring is a great time to plant shrubs and trees, so if you have a landscape project you have been thinking about doing, give Marcus Davis Lawn Care a call for a free estimate on any of your landscape project needs.

Did you know?

The market research experts at Business Research Insights report that the three-season sunroom market size is projected to nearly double between 2025 and 2035. BRI reports that 65 percent of homeowners prefer cost-effective sunrooms when seeking to extend their living space. The popularity of sunrooms can be traced to a number of variables, including year-round access to a home's surrounding landscape. That access might be hindered if the only spaces to experience nature is a patio, deck or another traditional type of outdoor living space. But sunrooms, particularly those equipped with heating and cooling, can bring homeowners in touch with nature during times of year when they might otherwise be compelled to steer clear of their outdoor living spaces due to less welcoming weather.
